SYNTHETIC Healthcare Policy Guidelines (Fictional)

1. Coverage Limit. The maximum payable amount per claim is USD 5,000.00. Amounts above this limit are not covered.

2. Waiting Period. Services dated within 30 days of the policy effective date (2026-08-01) are not covered. Services dated after the waiting period are eligible.

3. Exclusions. Cosmetic procedures, including CPT 15820 and 15821, are excluded from coverage.

4. Covered Procedures. CPT 99213 (office visit), 80053 (metabolic panel), 71046 (chest X-ray), and 27447 (knee replacement) are covered subject to limits.

5. Required Documents. Every claim requires a completed claim form and a diagnosis code. Procedures billed above USD 1,000 also require a prescription or referral.

6. Fraud Guidance. A claim whose billed amount is more than ten times the typical rate for its procedure, or that duplicates an existing claim (same member, provider, service date, and procedure), must be routed to investigation.

7. Decisions. Coverage-valid, low-risk claims may be approved. Policy failures are rejected after review. Missing required information is returned as PENDING_DOCUMENTS.
